INTRODUCTION

General Comments

This publication shows retail and service trade statistics on Alberta for the years 1969 through 1972. The statistics deal with all known businesses within the scope of the annual survey used to collect the data.

The mail survey, conducted immediately following the reference year, is based on all establishments provincially licensed to operate in Alberta and is augmented by a list of businesses operating in national parks. Respondents submit required information on a calendar or fiscal year basis. The survey covers all retail and service operations with the following exceptions: retail trade excludes door-to-door selling as well as retailing taken on as a minor activity by other businesses such as manufacturers and wholesalers; service trade excludes professions, institutions and service establishments which provide a service to other businesses.

Publication Content

The publication is divided into two major sections; the first dealing with retail trade and the second with service trade. Both sections contain five tables designed to show trade statistics on: Alberta, major centres, towns over 2,000 population, selected communities, and census divisions. Within each table, statistics deal with the total number of firms, male and female employees, payroll and receipts from sales or services for specified types of businesses.

The following two types of annotations support each table:

A. Introductory notes which preceed each table.

B. Specific footnotes related to the statistical data in the table. These footnotes point to limitations or exceptions in the data or terms.

The appendix provides useful supplementary statistics on taxation, population and trade per capita. To assist the user in identifying major centres and larger geographic areas specified in some of the tables, a provincial census division map is also included. Illustrations are included to provide the user with visual presentations of various components of the retail and service trade categories.

Definitions

Retail Outlet: A business establishment engaged primarily in selling merchandise to final users.

Service Outlet: A business establishment engaged primarily in providing a service to the public for a fee.

Publication Limitations

1. The 1969 statistics are presented on the basis of number of firms while information for 1970 and subsequent years are presented on a number of outlets basis. In 1970, the Bureau of Statistics required that multi-establishment companies report their total number of outlets in each geographic location. Previously these companies reported as a singular unit.
2. The 1970 statistics are not totally comparable to those for previous and subsequent years. Improvement in administrative procedures at the provincial licensing authority from which the base list of outlets is obtained, and the implementation

of modified survey procedures by the Bureau of Statistics combined to affect the comparability of the 1970 statistics.

3. Statistics on the activities of specific departments in department stores are not collected. Department store figures relate to the store's entire operation.

Publication Criteria

Statistics presented in this publication conform to confidentiality guidelines which prevent disclosure of information pertaining to individual establishments. An asterisk in place of any statistic indicates that disclosure is not possible. To prevent residual disclosure of a confidential statistic, it is sometimes necessary to suppress another statistic.

Disclosure of the number of outlets belonging to any particular business group is not governed by confidentiality rules and is therefore published.

SURVEY PROCEDURE

Mailing List

In preparation for the annual mail survey, a list of provincially licensed businesses is supplemented by a listing of establishments operating in national parks in Alberta. These two lists comprise the total universe of retail or service establishments surveyed in the specific survey year. These establishments are then coded to a specific business type and geographic area.

Survey Design

The respondents are required to provide information on the number of employees, payroll and receipts from sales or services for the calendar or fiscal year. Where necessary, a special code signifies an establishment as a head or branch office. In these instances the head office is sent the questionnaire and reports for all establishments by community.

The survey forms are mailed to establishments immediately following the reference year. As returned questionnaires are received they are edited. Corrections, if needed, are made to the questionnaires after written or telephone correspondence with the establishment in question.

Statistical Presentation

After all returned responses have been received, an automated check for non-responding outlets is conducted. Estimates are made for the non-responding outlets.

The statistics are arranged according to business type classifications in the geographic areas specified as: All Alberta, Census Divisions, Counties, Municipal Districts, Improvement Districts, Special Areas and Communities. The statistics listed under any particular business type classification in a geographic area are automatically checked against the confidentiality guidelines under which the Bureau of Statistics operates. Finally, statistical tables are compiled.

Acknowledgements

Appreciation is extended to the many establishments which regularly provide the data necessary for the preparation of this publication.

TABLE 1-3

The following table shows 1971 and 1972 principal retail trade statistics, by major groups, for towns in Alberta having a population of 2,000 and over.

Further breakdown by business type within the major groups is not presented in this table. In most instances the "business type" breakdown is not possible due to confidentiality restrictions.

TABLE 1-4

This table shows number of outlets and total retail sales for selected communities in Alberta. Statistics are provided for the years 1969 through 1972.

In certain instances, because of confidentiality guidelines under which the Bureau operates, it is necessary to suppress retail trade figures. Wherever possible this has been done by combining service receipts with the retail sales. Instances of this nature are indicated by two dots following the figure. Combining retail and service trade statistics results in partial duplication between tables 1-4 and 2-4.

Data for 1970 are deemed non-comparable to previous and subsequent years. See the Introduction for an explanation.

TABLE 1-5

This table shows 1969 through 1972 retail sales figures for the fifteen census divisions in Alberta. Statistics are provided for the various Counties, Municipal Districts, Improvement Districts, Special Areas and selected major centres within the census divisions. In order to determine the location of the geographic area being referred to by the statistics, a provincial census division map is included in the Appendix.

SERVICE TRADE BY LOCATION OF RECEIPTS, 1972

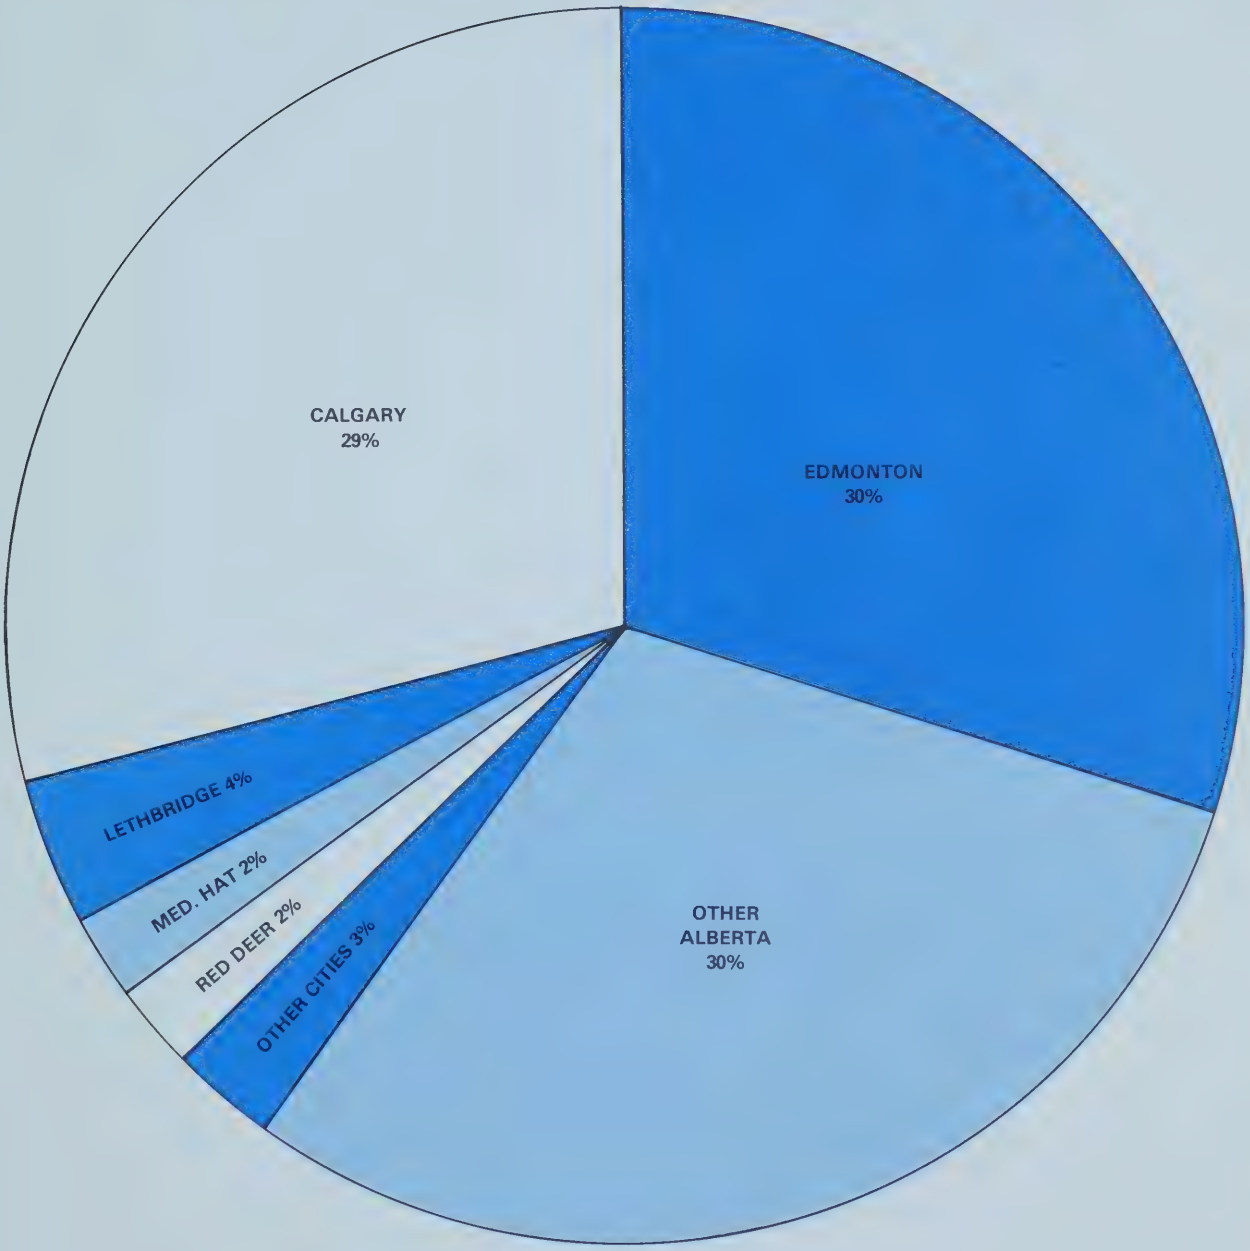

TABLE 2-3

This table shows principal service trade statistics for towns in Alberta having a population of 2,000 and over. Only total service trade figures can be provided. A more detailed breakdown is not possible since figures for most of the major groups are confidential.

TABLE 2 - 3

TABLE 2-4

This table shows the number of outlets and value of receipts for selected communities in Alberta. Statistics are provided for the years 1969 through 1972.

In certain instances, because of confidentiality guidelines under which the Bureau of Statistics operates, it is necessary to suppress service trade figures. Wherever possible, this has been done by combining service receipts with retail sales. Instances of this nature are indicated by two dots following the figure. Combining retail and service trade statistics results in partial duplication between tables 1-4 and 2-4.

Data for 1970 are deemed non-comparable to previous and subsequent years. See the Introduction for an explanation.

TABLE 2-5

This table shows service trade receipts for the fifteen census divisions in Alberta for the years 1969 through 1972. Statistics are provided for the various Counties, Municipal Districts, Special Areas and selected major centres within the census divisions.

In order to determine the location of the geographic area being referred to by the statistics, a provincial census division map is included in the Appendix.

TABLE 2 - 5
SERVICE TRADE BY MAJOR GROUPS, CENSUS DIVISIONS, 1969 - 1972

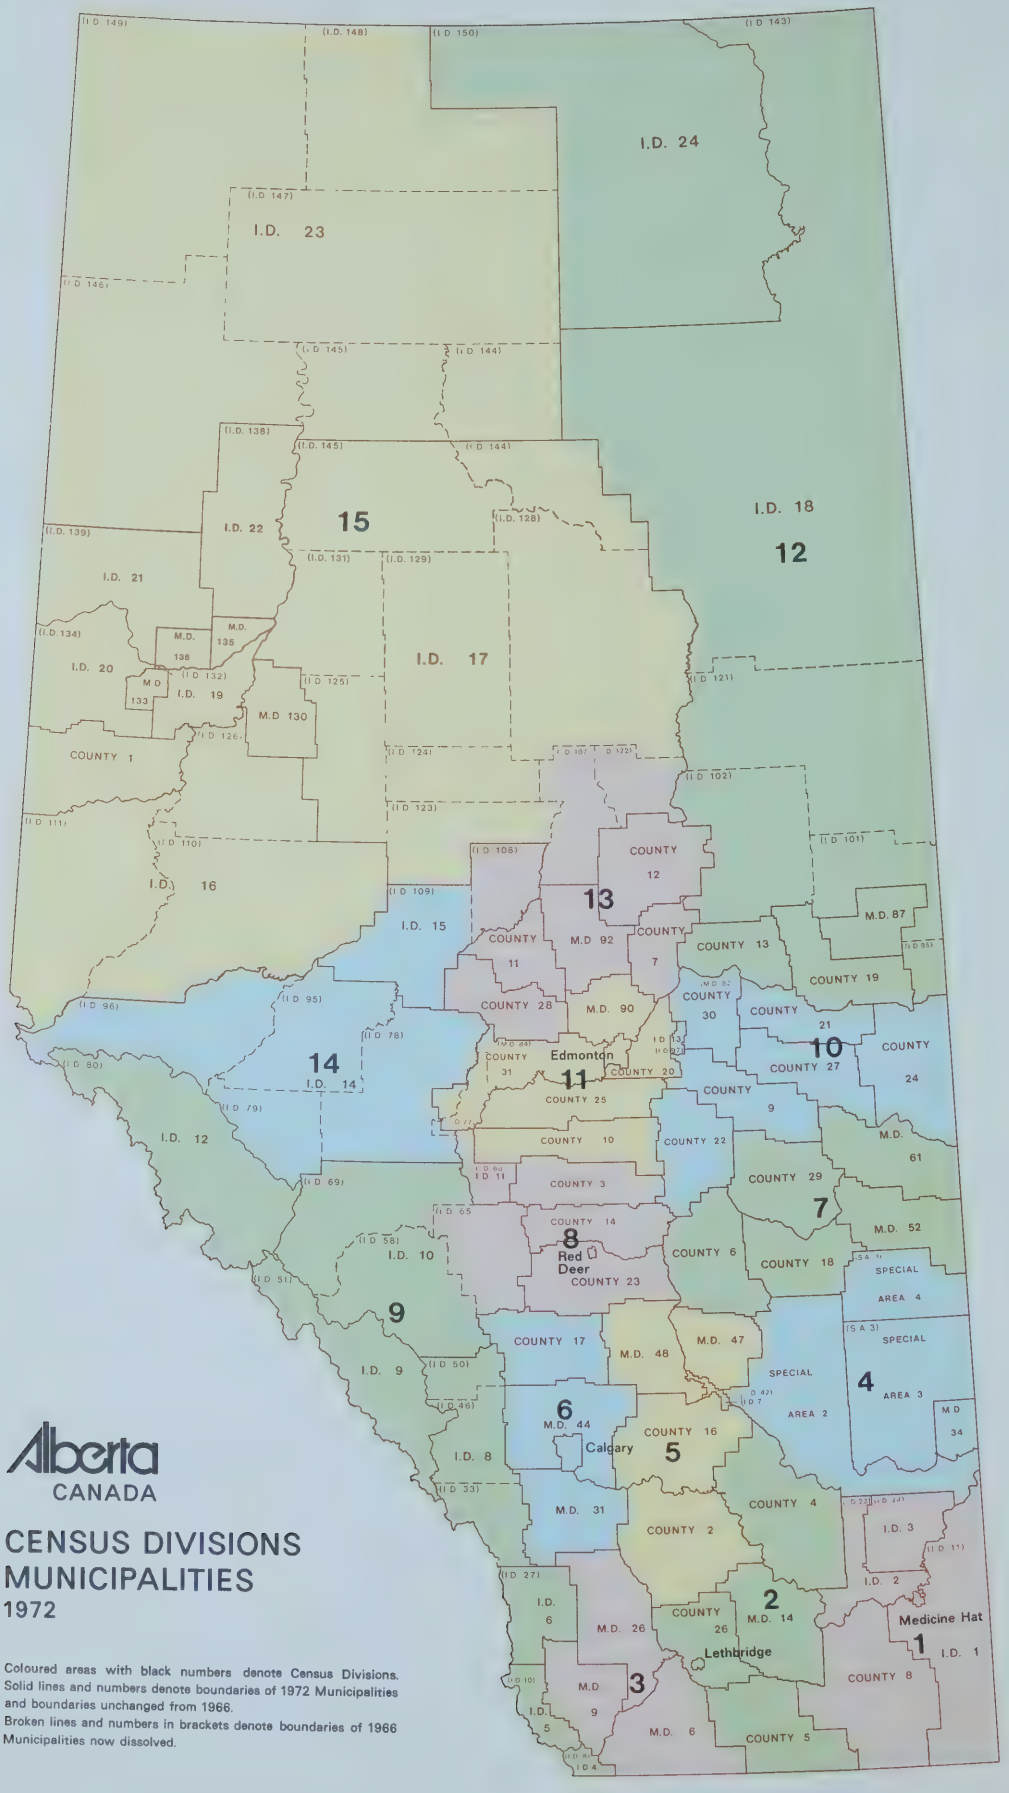
SECTION 3

APPENDIX



Alberta
CANADA

CENSUS DIVISIONS MUNICIPALITIES
1972

Coloured areas with black numbers denote Census Divisions.
Solid lines and numbers denote boundaries of 1972 Municipalities and boundaries unchanged from 1966.
Broken lines and numbers in brackets denote boundaries of 1966 Municipalities now dissolved.

TABLE 3 - 1

C.D. 15	96,300	95,600	94,762	93,300

C.D. - Census Division

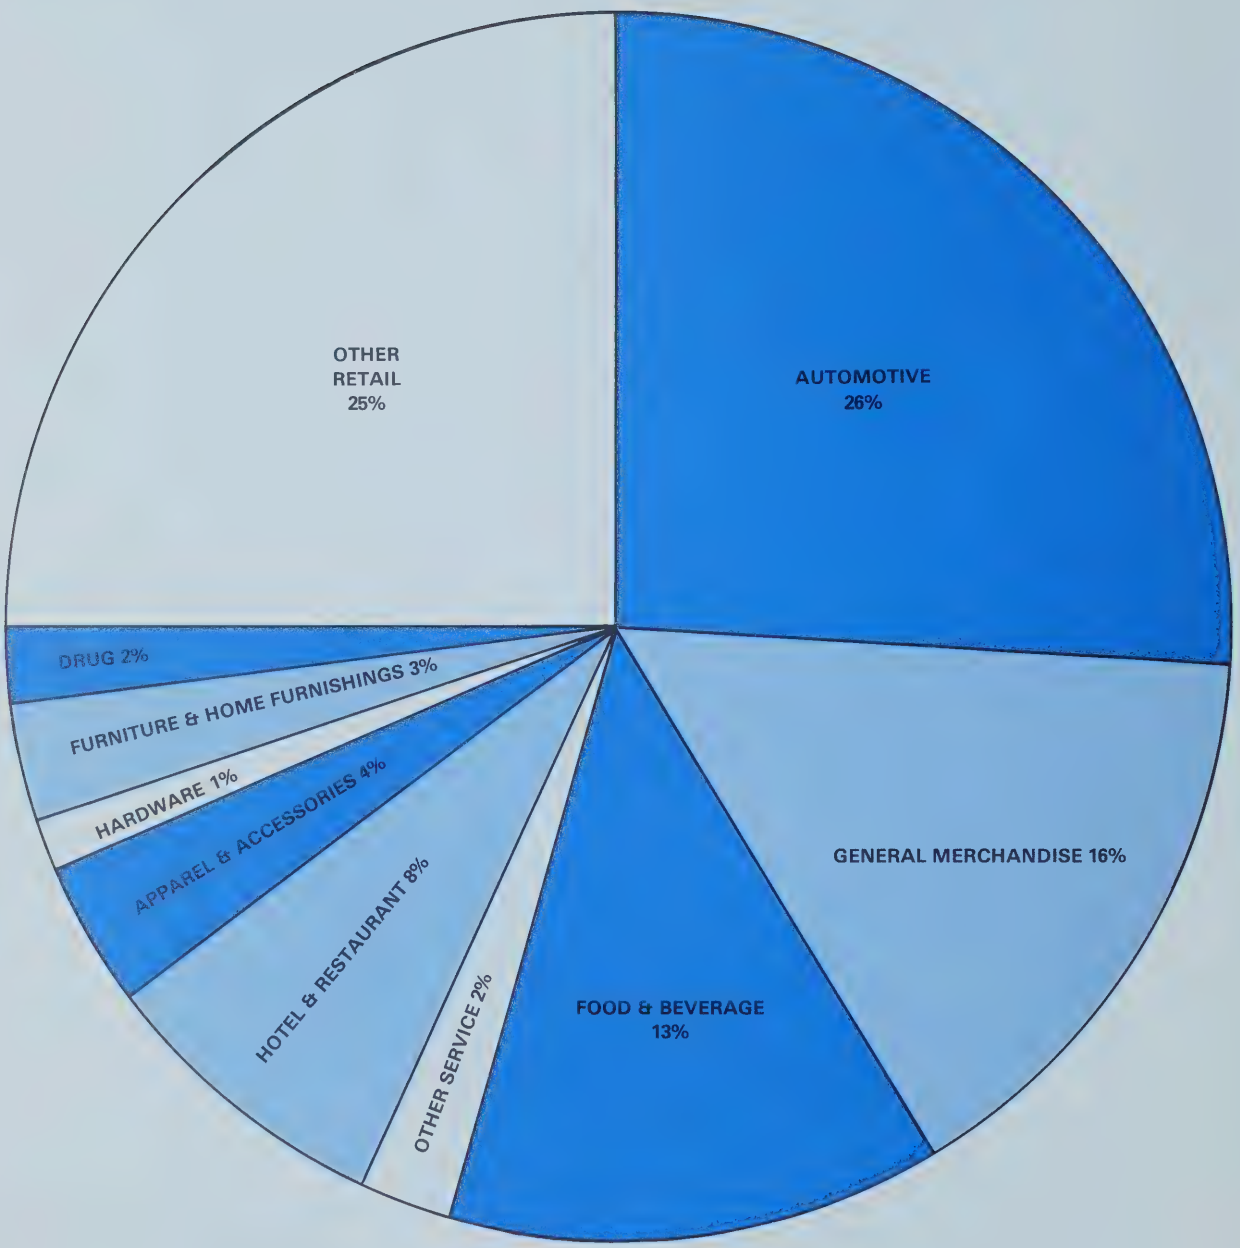
(1) - Figures in this table are estimates published by Statistics Canada. Estimates for Medicine Hat, Lethbridge and Red Deer are supplied by Alberta Municipal Affairs.

(2) - 1971 Census of Canada, Statistics Canada.

(3) - Calgary (proper) is equivalent to Calgary (metro).

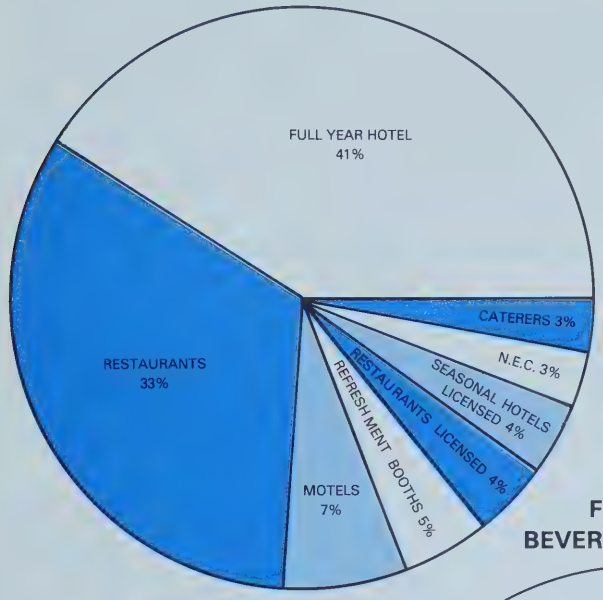
(4) - Edmonton (metro) includes Fort Saskatchewan, St. Albert, Morinville, Gibbons, Lon Accord, Legal, Strathcona County No. 20 and Sturgeon M.D. 90.

TOTAL TRADE, ALBERTA (1)
1972

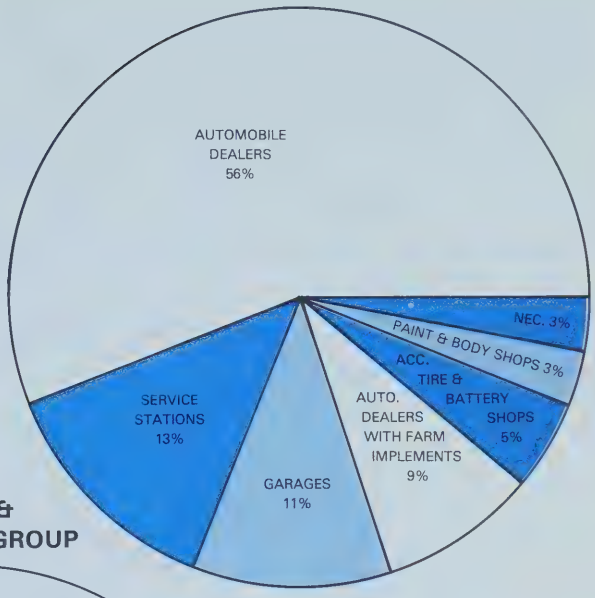


(1) A breakdown into components of the five major groups of total trade, is provided on the following page.

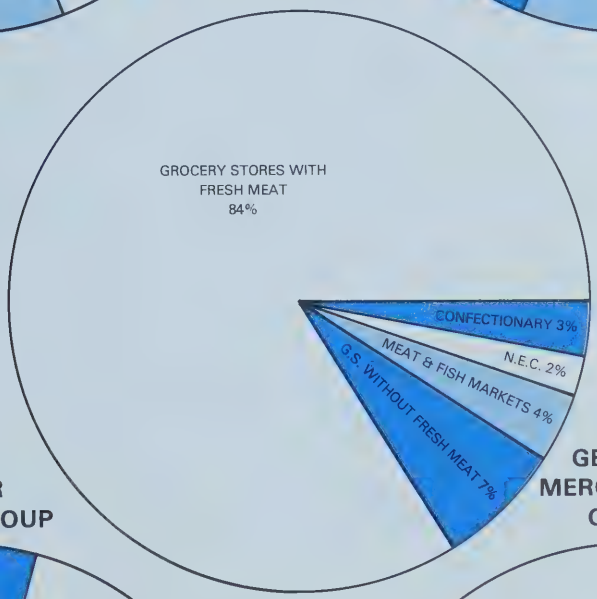
HOTEL, TOURIST CAMP & RESTAURANT GROUP



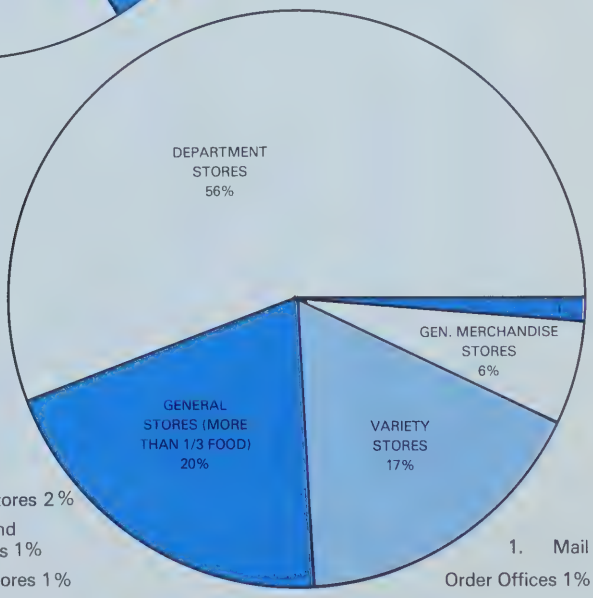
AUTOMOTIVE GROUP



FOOD & BEVERAGE GROUP

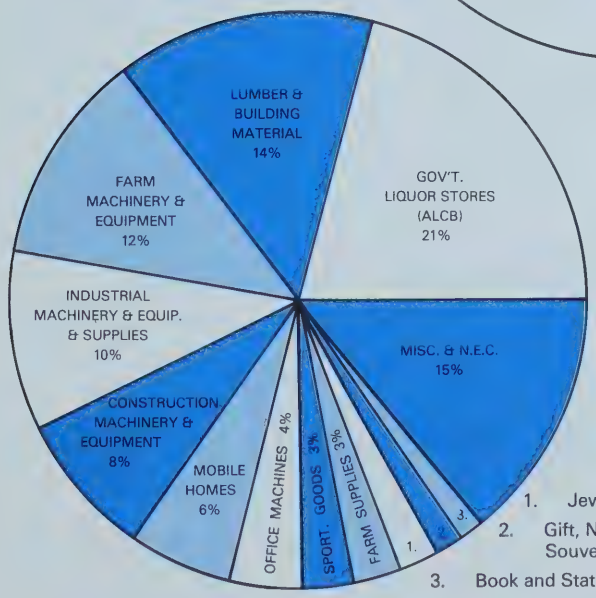


GENERAL MERCHANDISE GROUP



1. Mail Order Offices 1%

OTHER RETAIL GROUP



1. Jewellery Stores 2%
2. Gift, Novelty and Souvenir Shops 1%
3. Book and Stationary Stores 1%
